lnum: observed lining set

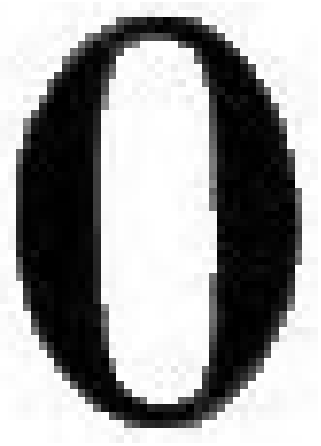

0123456789

Five new lining alternatives join the improved zero.tall. Existing 3, 4, 6 and 8 serve both settings.
Each native row retains its measured baseline and rigid rotation at one fixed page scale.
Source differences in figure height and overshoot remain; no numeral is stretched to a common top.
The selected zero is an intact repeated impression. The damaged central zero is comparison only.
All earlier encoded outlines and advances remain unchanged.

Tall zero: clearer source impression

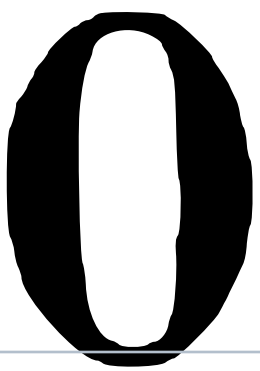

The ss01 substitution and 555-unit advance are preserved. The short zero remains encoded.

760 1000 1900 0.00

The larger GPO witness supplies a more even intact oval and counter without filling printing defects.
Thirteen common capitals establish poster scale; 47 matched header centers transfer it to this page.
The zero retains its measured row position. Its advance is preserved by horizontal centering only.
Four-times Lanczos sampling and threshold 150 retain one outer contour and one counter.

Observed poster punctuation

GPO 1904, printed page 120 / archive leaf 136. Fixed page scale and measured row baselines.

U+003A	U+003B	U+003F	U+2019

: ; ? ’

36pt

Oh, lunch: late lunch;
I’m late; will I jump?

24pt

Oh, lunch: late lunch;
I’m late; will I jump?

18pt

Oh, lunch: late lunch;
I’m late; will I jump?

12pt

Oh, lunch: late lunch;
I’m late; will I jump?

8pt

Oh, lunch: late lunch;
I’m late; will I jump?

Colon and semicolon retain two components; the question mark retains its separate dot.
The apostrophe is U+2019. No straight apostrophe alias or opening quote is inferred.

Figure settings at several sizes

Default and lnum use the same size and baseline; the 3, 4, 6 and 8 outlines are shared.

8pt lnum 0123456789 1904 12,345.67

Figure alternatives remain unencoded and are selected through OpenType substitutions.
ss01 selects the tall zero alone; lnum selects the six alternate forms as one complete lining set.
All six alternatives and both features are checked in OTF, TTF, WOFF and WOFF2.
