Whole observed fractions and symbols

Native crops enlarged independently; font outlines retain their source physical proportions.

Modern mid-cap placement at source size

Row centers at 350 units. The historical charts do not establish a co-set text baseline.

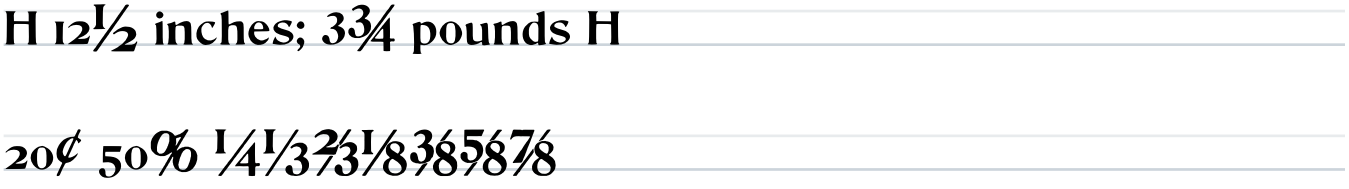

36pt

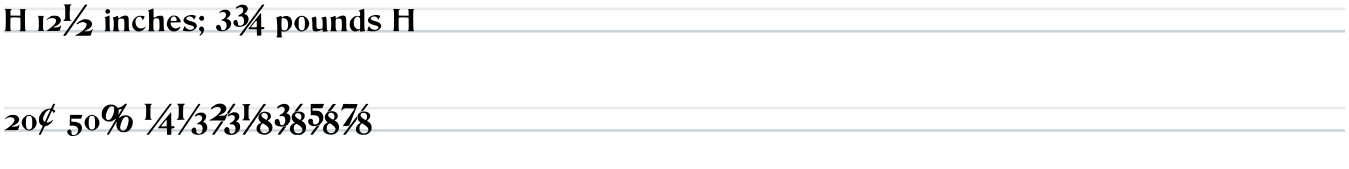

24pt

18pt

12pt

8pt

Each complete row receives one rigid rotation and one translation; no glyph is height-normalized.

The full-size fractions extend above capitals and below baseline within existing vertical metrics.

Fractions with both figure settings

Whole fraction forms retain source proportions beside observed figure variants.
